Career Research Presentation

Our final project that you will complete is a presentation on a career that you may be interested in the future. We will be taking a career cluster inventory to help determine what careers that you may enjoy. Once you complete the inventory, you will begin researching information regarding that career

REQUIREMENTS FOR THE PRESENTATION

- Title slide – your name, class period, career, and career cluster
- Description of the career (at least 5 facts)
- Educational requirements (examples – high school diploma, an associate's degree, a bachelor's degree, etc.)
- Special qualities and abilities that you will need to have in order to be successful in that career (at least 5)
- Salary range of the career
- Other interesting facts (at least 5) that you found out about the career.
- Bibliography slide – you will need to make sure that you keep track of all of the information that you found online so that you could create a bibliography slide with all of your citations.

SLIDES

- You should apply a design template to your presentation. Choose one that you like. Template must be the same throughout the presentation.
- Add clip art to all of your slides. You should not have more than 2 pictures on each slide. Too much clip art can make the presentation look bad.
- Font and font colors need to be consistent. The colors need to be easy to read on the design template you use and they need to follow the color scheme you are using.
- You will need to have slide transitions between each slide.

You will share your presentation to the class next week. It is important that your presentation is easy to hear and understand. You will be graded on the presentation itself, your delivery, and your behavior during the other student presentations.
